## Part I – Government Expenditure Plan

---

### Introduction

These Main Estimates are presented in five sections:

- Highlights of these Estimates;
- General Information about the Estimates process and how to use this document;
- Key Summaries of the authorities presented in these Estimates for Parliament’s approval or information;
- Detail by Organization on the voted authorities sought through these Estimates, as well as statutory forecasts;
- Annex – Items for inclusion in the Proposed Schedules to the Appropriation Bill.

### Highlights of these Estimates

Federal departments, agencies and Crown corporations provide programs and services for Canadians. In order for federal government organizations to operate, Parliament must give these organizations authority to spend. While spending is often announced in a federal budget, spending authority is granted through legislation passed by Parliament. These Main Estimates present financial requirements for the 2022–23 fiscal year.

Due to the need to table Main Estimates on or by March 1, emerging priorities and items announced in Budget 2022 will be included in future Estimates documents.

### Voted Expenditures

These Estimates support the government’s request to Parliament for authority to spend through annual appropriations:

- \$190.3 billion for budgetary expenditures – operating and capital expenditures; transfer payments to other levels of government, organizations or individuals; and payments to Crown corporations; and
- \$227.7 million for non-budgetary expenditures – net outlays and receipts related to loans, investments and advances.

These amounts include spending for initiatives announced in prior federal budgets and other funding decisions. Departmental Plans provide details on how these financial resources will be used to achieve planned results.

Of the 126 organizations presenting funding requirements in these Estimates, ten are seeking more than \$5.0 billion in voted budgetary expenditures:

- Department of Indigenous Services (\$39.5 billion);
- Department of National Defence (\$24.3 billion);
- Department of Employment and Social Development (\$11.4 billion);
- Public Health Agency of Canada (\$8.4 billion);
- Treasury Board Secretariat (\$7.8 billion);
- Department of Foreign Affairs, Trade and Development (\$7.1 billion);
- Office of Infrastructure of Canada (\$7.1 billion);
- Department of Crown-Indigenous Relations and Northern Affairs (\$5.8 billion);
- Department of Industry (\$5.5 billion); and
- Department of Veterans Affairs (\$5.5 billion).

### Statutory Expenditures

Forecasts of statutory spending are included in these Estimates to provide additional information on departments’ total estimated expenditures. Of these forecasts, \$207.3 billion is for budgetary expenditures, including the cost of servicing the public debt. This amount does not include benefits paid from the Employment Insurance Operating Account or expenditures legislated through the *Income Tax Act* (such as the Canada Child Benefit).

Significant changes in statutory budgetary spending from the 2021–22 Main Estimates include:

- increases in major transfer payments (as published in the Economic and Fiscal Update 2021), most notably elderly benefits, the Canada Health Transfer and fiscal equalization;
- an increase in interest on unmatured debt;
- an increase in Climate Action Incentive Payments;
- an increase in Canada Student Grants; and
- the winding down of benefit payments to individuals under the *Canada Recovery Benefits Act*.

Net statutory expenditures of \$139.0 million are forecasted for loans, investments and advances. Changes in non-budgetary planned expenditures reflect decreases related to:

- the sunseting of a one-year increase in loans for the construction of sustainable rental apartments and for the construction, repair and revitalization of affordable housing; and
- a decrease in student loans based on the latest actuarial projections and due in part to the end of a temporary increase to the weekly maximum loan limit.

Additional information on statutory authorities for COVID-19 related expenditures is presented on page I-5.

### General Information

Part I of this document, the Government Expenditure Plan, gives an overview of spending requirements for 2022–23, comparisons to previous fiscal years, a summary of legislation authorizing COVID-19 related expenditures and a comparison of these Estimates to the Economic and Fiscal Update 2021.

Part II of this document, the Main Estimates, provides information on estimated spending by each federal organization requesting authority to spend through a 2022–23 appropriation bill. Forecasts of statutory spending are included for information purposes.

Part III of the Estimates consists of Departmental Plans and Departmental Results Reports. It is anticipated that the Departmental Plans, which show an organization's priorities and expected results for the next three years, will be tabled shortly after these Estimates.

For these Main Estimates, the President of the Treasury Board tables this document in Parliament. In addition to the tabled document, the following information is available online:

- Budgetary expenditures by standard objects;
- Expenditures by purpose (core responsibility); and
- Statutory forecasts.

The following terminology is used throughout this document:

- **2020–21 Expenditures** refer to the actual expenditures published in the Public Accounts of Canada 2021 (Volume II);
- **2021–22 Estimates to date** include the aggregate of the requirements reported in the Main Estimates and Supplementary Estimates (A), (B) and (C) of that fiscal year;
- **Budgetary expenditures** include the cost of servicing the public debt; operating and capital expenditures; transfer payments to other levels of government, organizations or individuals; and payments to Crown corporations;
- **Non-budgetary expenditures** – or loans, investments and advances – are outlays that represent changes in the composition of the Government's financial assets. Negative figures indicate that recoveries exceed expenditures;
- **Supplementary Estimates** present information on additional spending requirements which were either not sufficiently developed in time for inclusion in the Main Estimates, or have subsequently been refined to account for developments in particular programs and services;
- **Voted** describes appropriations or expenditures for which parliamentary authority is sought through an appropriation bill;
- **Statutory** describes appropriations or expenditures which are authorized by Parliament through legislation other than an appropriation act; forecasts are provided for Parliament's information.

**Composition of Estimates**

The majority of expenditures in the 2022–23 Main Estimates are transfer payments – payments made to other levels of government, other organizations and individuals. Transfer payments make up approximately 61.1% of expenditures or \$243.1 billion. Operating and capital expenditures account for approximately 32.9% of expenditures or \$130.9 billion, while public debt charges are approximately 5.9% of expenditures or \$23.6 billion.

**Expenditures Related to COVID-19**

In addition to regular yearly appropriation acts, Parliament has passed several pieces of legislation during the pandemic which authorize related expenditures.

For the 2022–23 fiscal year, major economic response programs were enacted or amended by *An Act to provide further support in response to COVID-19* (Bill C-2, 44th Parliament). The Act:

- extended wage and rent subsidies;
- increased the maximum number of weeks and extended the Canada Recovery Sickness Benefit and the Canada Recovery Caregiving Benefit; and
- enacted the *Canada Worker Lockdown Benefit Act* to authorize the payment of the Canada Worker Lockdown Benefit in regions where a lockdown is imposed for reasons related to COVID-19.

For each of these programs, the benefit period ends May 7, 2022. The benefits may be extended by regulation to a date not later than July 2, 2022.

Additional information on COVID-19 authorities and expenditures is available online from GC InfoBase.

**Comparison of the Economic and Fiscal Update 2021 and Estimates**

The following reconciliation is for the purpose of providing greater clarity on the relationship between the figures presented in the Economic and Fiscal Update 2021 and the 2022–23 Estimates, and to allow for a more effective comparison and study of how the Estimates cash requirements are derived from the accrual-based budget plan.

**Comparison of the Economic and Fiscal Update 2021 and Main Estimates 2022–23**

	<b>2022–23</b> (billions of dollars)
<b>2022–23 Main Estimates</b>	<b>397.6</b>
<b>Plus: Items not included in Estimates</b>	<b>63.8</b>
<b>Of which:</b>	
Employment Insurance benefits	31.7
Canada Child Benefit	25.5
Other Tax Credits and Repayments	6.6
<b>Plus: Netted Revenue</b>	<b>12.6</b>
<b>Less: Accrual and other</b>	<b>(31.8)</b>
<b>Economic and Fiscal Update 2021 (Projected Total Expenses for 2022-23)</b>	<b>442.2</b>

**Items not included in the Estimates**

The Economic and Fiscal Update forecast covers the complete scope of the Government's fiscal framework, including revenues, program and tax expenditures, statutory expenditures such as Employment Insurance benefits, and provision for future obligations such as public service pensions. The scope of the Estimates is narrower than the Economic and Fiscal Update forecast. The main purpose of the Estimates is to support Parliament's consideration of the appropriation bills, which are the legal instruments for authorizing certain payments.

The Estimates are therefore focused on the government's cash needs which require parliamentary appropriations and exclude certain items reported in the Economic and Fiscal Update. Costs related to Children's benefits and Employment Insurance benefits are the largest components of the items excluded from the Estimates.

The Canada Child Benefit is legislated through the *Income Tax Act* and is considered an expenditure for government financial reporting purposes. Parliament does not authorize annual spending for this item or for any other tax expenditure or refundable tax credit.

Most Employment Insurance costs are paid directly out of the Employment Insurance Operating Account, rather than a departmental appropriation, and are therefore not included in the Estimates.

**Netted revenues**

Certain expenditures are funded through departmental revenues. Accrual expenses in the Economic and Fiscal Update are on a ‘gross’ basis, meaning the revenues are included in the accrual-based revenue forecast, while they are netted against expenditures in the Estimates.

**Accrual and other**

The Economic and Fiscal Update is presented on a full accrual basis whereas the Estimates are presented on a modified cash basis. The accrual basis of accounting recognizes income when it is earned and expenses when they are incurred, whereas cash accounting recognizes them when the cash or its equivalent has been paid. As a result, certain items will be reported differently between the two publications. This category also includes costs related to consolidated Crown corporations that are funded from their own revenues, as well as adjustments for items that have been approved and earmarked in the fiscal framework (at the time of the Economic and Fiscal Update and since then).

**Structure of these Estimates**

The basic structural units of the Estimates are the votes. The following types of votes appear in the Estimates:

A program expenditures vote is used when there is no requirement for either a separate “capital expenditures” vote or a “grants and contributions” vote. Generally, in cases where neither capital nor grants and contributions are expected to meet or exceed \$5 million on an ongoing basis, all expenditures are charged to a single vote.

An operating expenditures vote is used when there is also a requirement for either a “capital expenditures” vote or a “grants and contributions” vote or both.

Spending is charged to a capital expenditures vote for the acquisition or development of items that are classified as tangible capital assets as defined by government accounting policies, for example: for the acquisition of real property, infrastructure, machinery or equipment, or for purposes of constructing or developing assets, where an organization expects to draw upon its own labour and materials, or employs professional services or other services or goods. Expenditure items in a capital expenditures vote are for items that generally exceed \$10,000, although an organization may select a reduced threshold to be applied to different capital classes.

An organization may have a vote for grants and contributions, which are payments made for the purpose of furthering program objectives but for which no goods or services are received. It should be noted that the inclusion of a grant, contribution or other transfer payment item in the Estimates imposes no requirement to make a payment, nor does it give a prospective recipient any right to the funds. It should also be noted that in the vote wording, the meaning of the word “contributions” is considered to include “other transfer payments”.

A non-budgetary vote, identified by the letter “L” preceding the vote number, provides authority for spending in the form of loans or advances to, and investments in, Crown corporations; and loans or advances for specific purposes to other governments, international organizations or persons or corporations in the private sector.

The government must also establish separate votes for each distinct legal entity and to make payments to Crown corporations. Where this is the case, a separate vote structure is established for each. A legal entity for these purposes is defined as a unit of government operating under an act of Parliament and responsible directly to a Minister.

To support the Treasury Board in performing its statutory responsibilities for managing the government’s financial, human and materiel resources, a number of special votes are required. These votes are described under the Treasury Board Secretariat in the Proposed Schedules to the Appropriation Bill.

**Changes in 2022–23 Main Estimates****Changes to Voted Authorities**

The following new or amended authorities are sought through the Appropriation Act for these Estimates:

- The Canadian Commercial Corporation is adding Vote 1 for payments to the Corporation;
- The Department of Finance is amending the wording of Votes 5 and L10 to limit the maximum amount of financial assistance to the International Development Association for the 2022–23 fiscal year;
- The Department of Foreign Affairs, Trade and Development is amending the wording of Votes 20 and L25 to limit the maximum amount of financial assistance to international financial institutions for the 2022–23 fiscal year;
- The Department of Health is amending Vote 1 to authorize the Department to enter into commitments in the fiscal year in that vote provided that the total of the amount committed does not exceed the total unencumbered balance available out of Votes 1, 5 and 10;
- The Department of National Defence is increasing the authority for total commitments in Votes 1, 5 and 10 to \$52,571,272,691;

- The Department of Public Works and Government Services is adding Vote L10 to extend (until June 30, 2027) the \$50 million aggregate limit for imprest funds, accountable advances and recoverable advances;
- The Parks Canada Agency is adding Vote 5 for capital expenditures; and
- The Jacques-Cartier and Champlain Bridges Inc. is amending Vote 1 to specify expenditures for the deconstruction of the original Champlain Bridge.

## Canadian Commercial Corporation

### Raison d'être

The Canadian Commercial Corporation (CCC) is governed by its enacting legislation, the 1946 *Canadian Commercial Corporation Act*. The Act outlines CCC's broad mandate, which is to assist in the development of trade by helping Canadian exporters access markets abroad and by helping foreign buyers obtain goods from Canada. The legislation also provides CCC with a range of powers, including the ability to export goods from Canada either as principal or as agent in such a manner and to such an extent as it deems appropriate. As a result, CCC facilitates export transactions from Canada by negotiating and executing bilateral government-to-government procurement arrangements and utilizing Canadian companies to fulfill supply requirements.

CCC's funding is derived primarily from two sources: an appropriation specifically to fund CCC's delivery of the US-Canada Defence Production Sharing Agreement (DPSA) and cost recoveries from all other fee-based international activities.

CCC reports to Parliament through the Minister of International Trade, Export Promotion, Small Business and Economic Development.

## Canadian Intergovernmental Conference Secretariat

### Raison d'être

The Minister of Intergovernmental Affairs, Infrastructure and Communities is responsible for this organization. The Canadian Intergovernmental Conference Secretariat (CICS), established pursuant to an agreement reached at the May 1973 First Ministers' Conference, is an agency of the federal, provincial and territorial governments. Its mandate is to provide administrative support and planning services for intergovernmental conferences of First Ministers, Ministers and Deputy Ministers.

These intergovernmental conferences are a key instrument for consultation and negotiation among the different orders of governments and assist in the development of national and/or provincial/territorial policies. They are a critical component of the workings of the Canadian federation and represent a core principle of our democratic society.

By skillfully executing the logistical planning and delivery of these meetings, CICS not only relieves governments of the administrative process burden but also allows them to greatly benefit from significant cost efficiencies and economies of scale.

Additional information can be found in the Organization's Departmental Plan.

### Raison d'être

The Canadian Transportation Accident Investigation and Safety Board, commonly referred to as the Transportation Safety Board of Canada (TSB) in its day-to-day activities, is an independent agency created in 1990 by an Act of Parliament. It operates at arm's length from other government departments and agencies to ensure that there are no real or perceived conflicts of interest. The TSB's sole objective is to advance air, marine, rail and pipeline transportation safety.

The President of the Queen's Privy Council for Canada is the designated minister for the purposes of tabling the TSB's administrative reports in Parliament, such as the Departmental Plan and the Departmental Results Report. The TSB is part of the Privy Council portfolio of departments and agencies.

Additional information can be found in the TSB's Departmental Plan.

## Canadian Transportation Agency

### Raison d'être

The Canadian Transportation Agency (CTA) is an independent, quasi-judicial tribunal and regulator that has, with respect to all matters necessary for the exercise of its jurisdiction, all the powers of a superior court.

The CTA oversees the very large and complex Canadian transportation system, which is essential to the economic and social well-being of Canadians.

The CTA's decision-makers are regular Members appointed by the Governor-in-Council (GIC) and temporary Members appointed by the Minister of Transport from a GIC-approved roster. Members' key functions include making adjudicative rulings, regulations, and regulatory determinations, as well as designating CTA staff to exercise the role of enforcement officers.

What the CTA does: three mandates

- The CTA helps ensure that the national transportation system runs efficiently and smoothly in the interests of all Canadians: those who work and invest in it; the producers, shippers, travellers and businesses who rely on it; and the communities where it operates;
- The CTA protects the human right of persons with disabilities to an accessible transportation network; and
- The CTA provides consumer protection for air passengers.

How the CTA does it: three tools at its disposal

- Rule-making: The CTA develops and applies ground rules that establish the rights and responsibilities of transportation service providers and users and that level the playing field among competitors. These rules can take the form of binding regulations or less formal guidelines, codes of practice or interpretation notes;
- Dispute resolution: The CTA resolves disputes that arise between transportation providers on the one hand, and their clients and neighbours on the other, using a range of tools from facilitation and mediation to arbitration and adjudication; and
- Information provision: The CTA provides information on the transportation system, the rights and responsibilities of transportation providers and users, and the CTA's legislation and services.

More information on the CTA's role, mission and mandate is available on the Agency website, and in the Departmental Plan.

## Department of Citizenship and Immigration

### Raison d'être

Canada is a country that has been positively impacted by immigration, welcoming 19 million people since Confederation and home to over 200 ethnic communities. Immigration has been crucial in shaping Canada into the diverse and prosperous nation it is today and, looking forward, stands to be equally fundamental to Canada's future social cohesion and economic prosperity. To this end, Immigration, Refugees and Citizenship Canada facilitates the entry of temporary residents, manages the selection, settlement and integration of newcomers, grants citizenship and issues passports to eligible citizens.

The Minister of Immigration, Refugees and Citizenship is responsible for this organization.

Note: Until the establishing legislation is amended, the legal name of the department for the purposes of Appropriation Acts remains Department of Citizenship and Immigration.

Additional information can be found in the Organization's Departmental Plan.

## Department of Justice

### Raison d'être

Established in 1868, the Department of Justice Canada (the Department) supports the dual roles of the Minister of Justice and the Attorney General of Canada. Under the *Department of Justice Act*, the Minister is the legal advisor to Cabinet and ensures that the administration of public affairs is in accordance with the law. The Minister of Justice is responsible for matters connected with the administration of justice that fall within federal jurisdiction and fulfils this responsibility by developing policies, laws, and programs to strengthen the national framework.

Under the *Department of Justice Act*, the Attorney General of Canada is the chief law officer of the Crown. The Attorney General provides legal services to the government and its departments and agencies. These services include the provision of legal advice, the conduct of litigation and the drafting of legislation and regulations. The Attorney General represents the Crown and not individual departments or agencies. Therefore, the Attorney General seeks to protect interests for the whole of government when providing legal advice and conducting litigation.

Additional information can be found in the Organization's Departmental Plan.

## Senate

### Raison d'être

The Senate of Canada, established by the *Constitution Act, 1867*, functions as a chamber complementary to, and independent of, the House of Commons. The Senate has 105 members appointed from the provinces and territories. Its primary purpose is to study and review all legislation passed by the House of Commons or initiated in the Senate. Both houses of Parliament must approve bills in identical form before they can become law. The Senate has the power to adopt, amend or reject any bill. In practice, it rarely defeats bills, but does frequently amend them. Through its committees, the Senate also undertakes the examination of public policy issues, often of a far-reaching and long-term nature, providing guidance to government and informing the national debate on issues of importance to Canadians.

The Speaker of the Senate is responsible for this institution.
